

Weather Impact

Weather Data Analyst and Project Manager

Weather Impact BV is a Dutch company specialized in the impact of weather events and climate change. We work all over the world, delivering services to the agricultural and insurance sector. We develop innovative tools that allow our clients to minimize risks and make decisions more effectively. Weather Impact offers an inspiring environment with creativity, challenging assignments and room for personal growth and development.

Who are we looking for?

For the further development of our company we are looking for an enthusiastic fulltime co-worker for the realization and management of projects in the field of operational weather services. You should have:

- A master degree in meteorology, physics, hydrology or related science
- Excellent communicative skills in English
- Good knowledge of scripting (e.g. Python, R , Matlab, etc.)
- Experience with project management, good coordinating and management skills
- A result-oriented attitude
- Structured approach to problem solving
- A flexible and entrepreneurial spirit
- Working well both independently and in a team

Your activities

You will be working on national and international projects. Our projects involve the delivery of tailored weather forecasting and alerting for extreme weather events. Your key responsibility will be to maintain the high quality of our operational service level and to be part of the development of new products for our clients. In addition, you will be responsible for the management of projects.
